

### Step 1

Cut with sharp knife or scissors to correct size, allow approximately 3cm surplus at each edge. Grid lines on backing paper are at 1cm intervals.

### Step 2

Fold covering in half to get centre, remove backing paper from one half of the cut piece.

### Step 3

Place the spine of the book in the centre crease and roll book on to the adhesive. For thicker books that don't roll, place on gently and smooth out or roll contact onto book.

### Step 4

Cut corners and trim in towards spine as illustrated.

### Step 5

Fold in surplus film, firmly press and smooth down.  
**NB. Contact Premium 150 should be trimmed flush.**

### Step 6

Remove backing paper from remaining half of film and repeat steps 3, 4 and 5. Allow a minimum of 48 hours to form a permanent bond.

## Product Guide & Usage

This table is a guide only. It indicates the type of book covering product recommended for different applications.

Covering	Value	Premium	Magazines	Dust Jackets	Paper Backs	Hard Cover	Text Books
