

## Snap Frame Poster Hanger

---

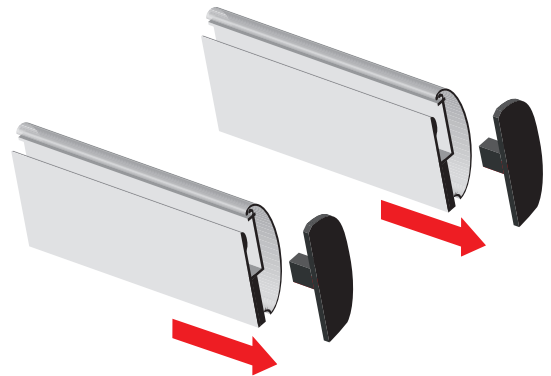

### STEP 1

Work out where you would like to display the top of your Snap Frame Poster Hanger. Ensure you have allowed 1cm from the top rail for screws/hooks (refer to image).

### STEP 2

To insert your poster remove the caps on both ends of each rail.

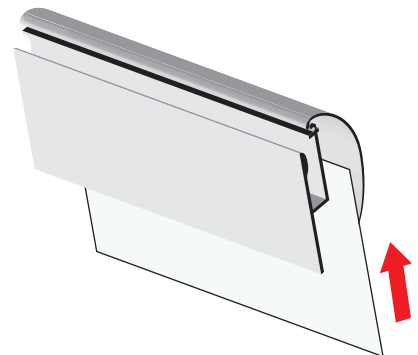

### STEP 3

Then use your thumbs to push forward the curve side of the rail out which will open the Snap Frame Poster Hanger.

### STEP 4

While holding the curve side out, insert your poster sheet in. Once the poster is in, repeat the same method to the other rail.

### STEP 5

Finally, once the poster is securely locked into the rail, place the rail caps back on either end of both rails. You can now efficiently display your poster.
